June 09, 2005

Ron Wade, owner and founder of Chevs of the 40's spent many years and thousands of dollars searching for database software that could accomplish specific tasks while being a single source, multiple database for maintaining our parts data, customer data, advertising data and more. This was Ron's vision.

Software finally was found that had the possibilities to accomplish those tasks. Aaron W. Beck was recommended to install and customize that software. Aaron virtually rewrote the software to accomplish tasks that the previous software companies had said couldn't be done. Aaron's FileMaker Database Knowledge and programming skills gave a us an extremely dependable (zero down time) and very efficient software package that allowed us to drastically increase sales dollars and volume of product moved without the need to increase our workforce.

Working with Aaron has been a pleasure because he has always found solutions for our programming needs and is readily available for technical assistance. We anxiously await our conversion to Aaron's FileMaker 7.0 version of Coyote Software since it has more capabilities than our current software yet incorporates all of our currently used features.

Chevs Of The 40's highly recommends RecordKeeper Software for your FileMaker Programming needs.

A handwritten signature in cursive script, reading "Harvey DeGrande". The ink is dark and the signature is fluid and legible.
